

The solution to solving individual temperature control problems

ZONE ONE™ STAND-ALONE ZONE DAMPERS AND DIFFUSERS

Zone One™ is a control damper assembly designed to solve over-heating and over-cooling problems. It can be used to control a single room, or by using a number of dampers, zone multiple rooms. Zone One™ can be purchased as two-position or fully modulating. A fully modulating VAV diffuser is also available.

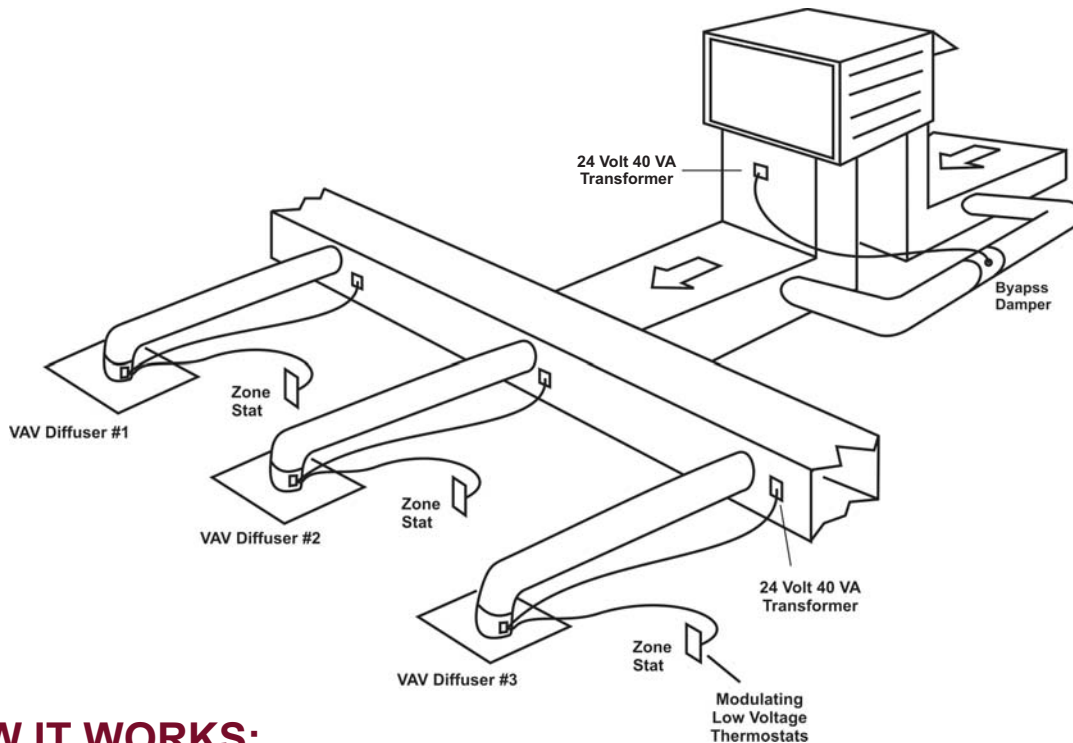

Reasons For Buying From Jackson Systems

- Innovative Control Products
- Simple to Install
- Direct to Contractors
- Great Technical Support
- Free Shipping
- Orders Shipped The Same Day
- Formal Quotes Provided Within Minutes
- Design Assistance Provided
- Online Ordering
- 5 Year Warranty

MADE IN
USA

Zone One™

HOW IT WORKS:

The automatic changeover duct sensor located on the damper or diffuser senses whether there is warm air or cool air in the branch supply duct. If the thermostat calls for cooling and the duct sensor determines there is cool air in the duct, the damper or diffuser will open; otherwise it will remain closed. If the thermostat is calling for heat and the duct sensor determines there is warm air in the duct, the damper or diffuser will open; otherwise it will remain closed.

FEATURES:

- Available in two-position and modulating
- Available in round or rectangular
- Available as a VAV diffuser
- Auto changeover
- Minimum position adjustment
- LED status indication
- Controls are pre-wired from factory
- No control panel required
